

Dear FCC Representative;

I am writing you to support the current FM translator service that allows Air1 to operate and be broadcast in my community. Air1 is a wonderful station that provides awesome worship music that I feel grateful to have available in my local area.

If Air1 were to be replaced by a LPFM broadcaster many many people would lose access to this great station. Besides playing music Air1 is also involved in many local, national, and worldwide charities. Without Air1 locally the community would lose a lot of support from Air1.

Finally Air1 benefits the community because it provides music with a message for a lot of listeners. In an age where family values are on a downhill slide it's refreshing to know I still have access to Air1 which promotes good values and choices.

Thanks for your consideration regarding this matter.

Sincerely,

Roland McClung
